

REBUILT CALIPER HEADQUARTERS OF AMERICA

QUESTIONS? CALL HQ

562-528-8200

Mon-Fri 8:00-5:00PST

**START HERE - LET'S GET REBUILDING!**

Before shipping your caliper cores, please remove and dispose of any brake fluid that remains in the caliper bodies. Leaking fluid and excess movement can weaken the box resulting in caliper damage or loss. Double bag each caliper in a plastic (ziplock) bag. Use appropriate packing materials (newspaper, rags, bubble wrap) to prevent movement and damage to the shipping box. Calipers should be tight and secure in the box without any room to move. Don't be shy with the tape, we recommend double or triple taping the shipping carton to ensure safe delivery.

- 1.) Drain excess brake fluid and dispose of properly.
- 2.) Double bag each caliper in plastic bags and seal to prevent fluid damaging the shipping box.
- 3.) Place caliper units into appropriate shipping box. We recommend heavy corrugated or double wall.
- 4.) Calipers should be secure in the box without any movement to prevent damage during transport.
- 5.) Complete CALIPER ORDER FORM and place into a ziplock bag inside shipping box.
- 6.) Fold this sheet in half and attach securely to shipping box.
- 7.) Complete return address information.
- 8.) Ship to Caliper HQ using the courier of your choice. USPS Flat Rate shipping is recommended.

**CAUTION: Brake fluid is corrosive and can cause skin irritations, clean any spilled brake fluid immediately to avoid damage or bodily harm. If you get brake fluid on your skin, wash it off immediately to avoid irritation.**

FOLD HERE AND ATTACH LABEL TO SHIPPING BOX
